

Norwegische Waldkatzen av Elvegard

Farbcodes bei den Norwegischen Waldkatzen in der FIFe

In einigen Stammbäumen steht die Farbbezeichnung der Katze/Kater, aber bei der FIFe finden Sie nur entsprechende Farbcodes. Die **häufigsten Farbcodes** der FIFe habe ich hier mal dargestellt (hoffentlich einigermaßen übersichtlich), damit sollten Sie die Farbe der Katze/Kater herauslesen können.

In der linken Tabelle finden Sie die non-agouti Katzen (d.h. Vollfarbtiere) und in der rechten Tabelle die agouti-Katzen (d.h. alle getigerten Tiere). Außerdem finden Sie in dem unteren Teil der Tabelle alle Farben mit weiß.

Die vollständige Tabelle können Sie im Internet unter
